Dear DeviceAnywhere Users,

This month we've added over 30 new handsets to the device bank, including over 10 handsets to the O2 UK VDL. In addition, DeviceAnywhere was proud to be chosen to support the launch of the Motorola MOTODEV App Accelerator Program. And lastly, DeviceAnywhere made the Inc. 500 list, which highlights the fastest growing companies in the US!

To hear more DeviceAnywhere news, and to see the list of recently added and upcoming devices, please read on!

Motorola Launches the MOTODEV App Accelerator Program Utilizing DeviceAnywhere Test Center and Proof Center

Motorola recently launched their App Accelerator Program, designed to give developers a head start in creating Android applications for Motorola's next generation of handsets. The App Accelerator Program includes 10 free hours of time on a special DeviceAnywhere Motorola AAP VDL package only available to program members. In addition, the AAP takes advantage of DeviceAnywhere Proof Center, which automatically tests submitted applications against Motorola's launch criteria.

DeviceAnywhere and Motorola worked closely together to provide a seamless and unique process for developers to easily and quickly get their new applications to market.

DA Tips and Tricks

The BlackBerry Storm operates differently than the standard touch screen device. To use the BlackBerry Storm in DeviceAnywhere Studio, follow these instructions:

1. To highlight an item on the device screen, left-click on the item (corresponds to a light touch on the physical device).
2. To scroll on the device (e.g. scroll down the main menu) left-click, hold, and drag in the direction you would like to scroll.
3. To select an item on the device screen, right-click on the item (corresponds to a touch and press on the physical device).
4. To bring up the DeviceAnywhere Studio device menu, right click in the workspace, outside of the device screen area (right-clicking inside the device screen area selects the item on the screen, as described in #3 above).
