Dear DeviceAnywhere Users,

Another month, and over 20 new handsets have been added to the device bank. Among them is the Palm Pre Phone, which we launched the day it was commercially available! Also in June, DeviceAnywhere and LG partnered to launch the LG VDL.

You may notice that we've streamlined the newsletter format and included fewer device images. However, interested readers can still see a full list of all new and upcoming handsets by clicking on the link in the handset section below. To view our new handsets, and to hear about other DeviceAnywhere news, please read on!

LG and DeviceAnywhere Launch the LG VDL!

DeviceAnywhere and LG have partnered to launch the LG VDL! Two packages are offered; a North America package that contains over 100 handsets, and a European package that contains 40 LG handsets. [Click here](#) to learn more.

DeviceAnywhere In the News!

DA Tips and Tricks

The new Palm Pre Phone launched with a number of unique touch screen gestures that are used to perform different commands on the device.

DeviceAnywhere supports these gestures; however, please note that to perform a gesture in DeviceAnywhere, you must first complete the entire gesture while holding down the left button of your mouse. When you are finished with the gesture, release the mouse button, and the gesture will be performed on the device.

To view our Pre Phone gestures guide, [click here](#).

Resources

Attend a free DeviceAnywhere Training Webinar! We have two upcoming webinars scheduled:

The next webinar is scheduled for Thursday July 9th, at 3:00 - 4:00 PM BST (British Standard Time). [Click here](#) to sign up.

We also have a webinar scheduled later in the day for users closer to Pacific Daylight Time, on Thursday, July 16th, 9:00 - 10:00 AM PDT. [Sign up here](#).

Check out the updated [DeviceAnywhere Blog](#)! Along with articles, it now includes recently launched devices, new packages, and updates on DeviceAnywhere functionality!
